## \$400

### **Parent Recommendation:**

"From the moment I met Francine, her genuine concern, resourcefulness, continuing self-education, and dedication to her students was self-evident. Equally important, her ability to relate to her students, converse with them, motivate them, and create unique learning environments tailored to the needs of the child were unparalleled. I cannot imagine how many teenagers have graduated high school because of the extra efforts she has extended in reaching out to sometimes challenging students. There is no doubt that at least two of my teenagers would not have graduated high school without her guidance. With these students coming from challenging backgrounds, her ability to create a learning environment where they could come and work on what they needed help with while being able to also participate in physical activity and socialize made a big difference in their educational outcomes."

- S. Guthrie
